Project update – Woodhouse Road & Patumahoe Road, Patumahoe

Kia ora,

In February we wrote to you about plans to make it safer and easier for people to walk and cross the road at Woodhouse Road and Patumahoe Road, right in the heart of the Patumahoe village centre. These upgrades formed part of the Franklin Targeted Rate Paths Programme - a 10-year partnership between Auckland Council, Auckland Transport (AT), and the Franklin Local Board.

What we proposed

- Installing an at grade (non raised) zebra crossing on Woodhouse Road.
- Installing an at grade (non raised) zebra crossing on Patumahoe Road outside the shops.
- Introducing proposed parking changes including angled parking.
- Improvements to the footpath on Woodhouse and Patumahoe Road.

Design update – what has changed

- The proposed crossing on Patumahoe Road has been moved further east to accommodate parking loss concerns as well as congestion concerns at the intersection
- The proposed Woodhouse Road crossing remains unchanged and will proceed as originally consulted on.
- Installing 12 formalised parking spots on the Southern side of Patumahoe Road instead of 9 on the previous design
- Installing 3-4 parking spots on the Northern side of Patumahoe Road in place of the old proposed area for the crossing.
- This design update will still result in a total loss of 14 parking spots overall.

Please refer to the below drawings to see the updated design.

We will continue to keep the community updated as the project progresses and will be in touch again closer to construction with information about timing, access and any temporary impacts during the works. Construction is planned to begin in Summer 2027.

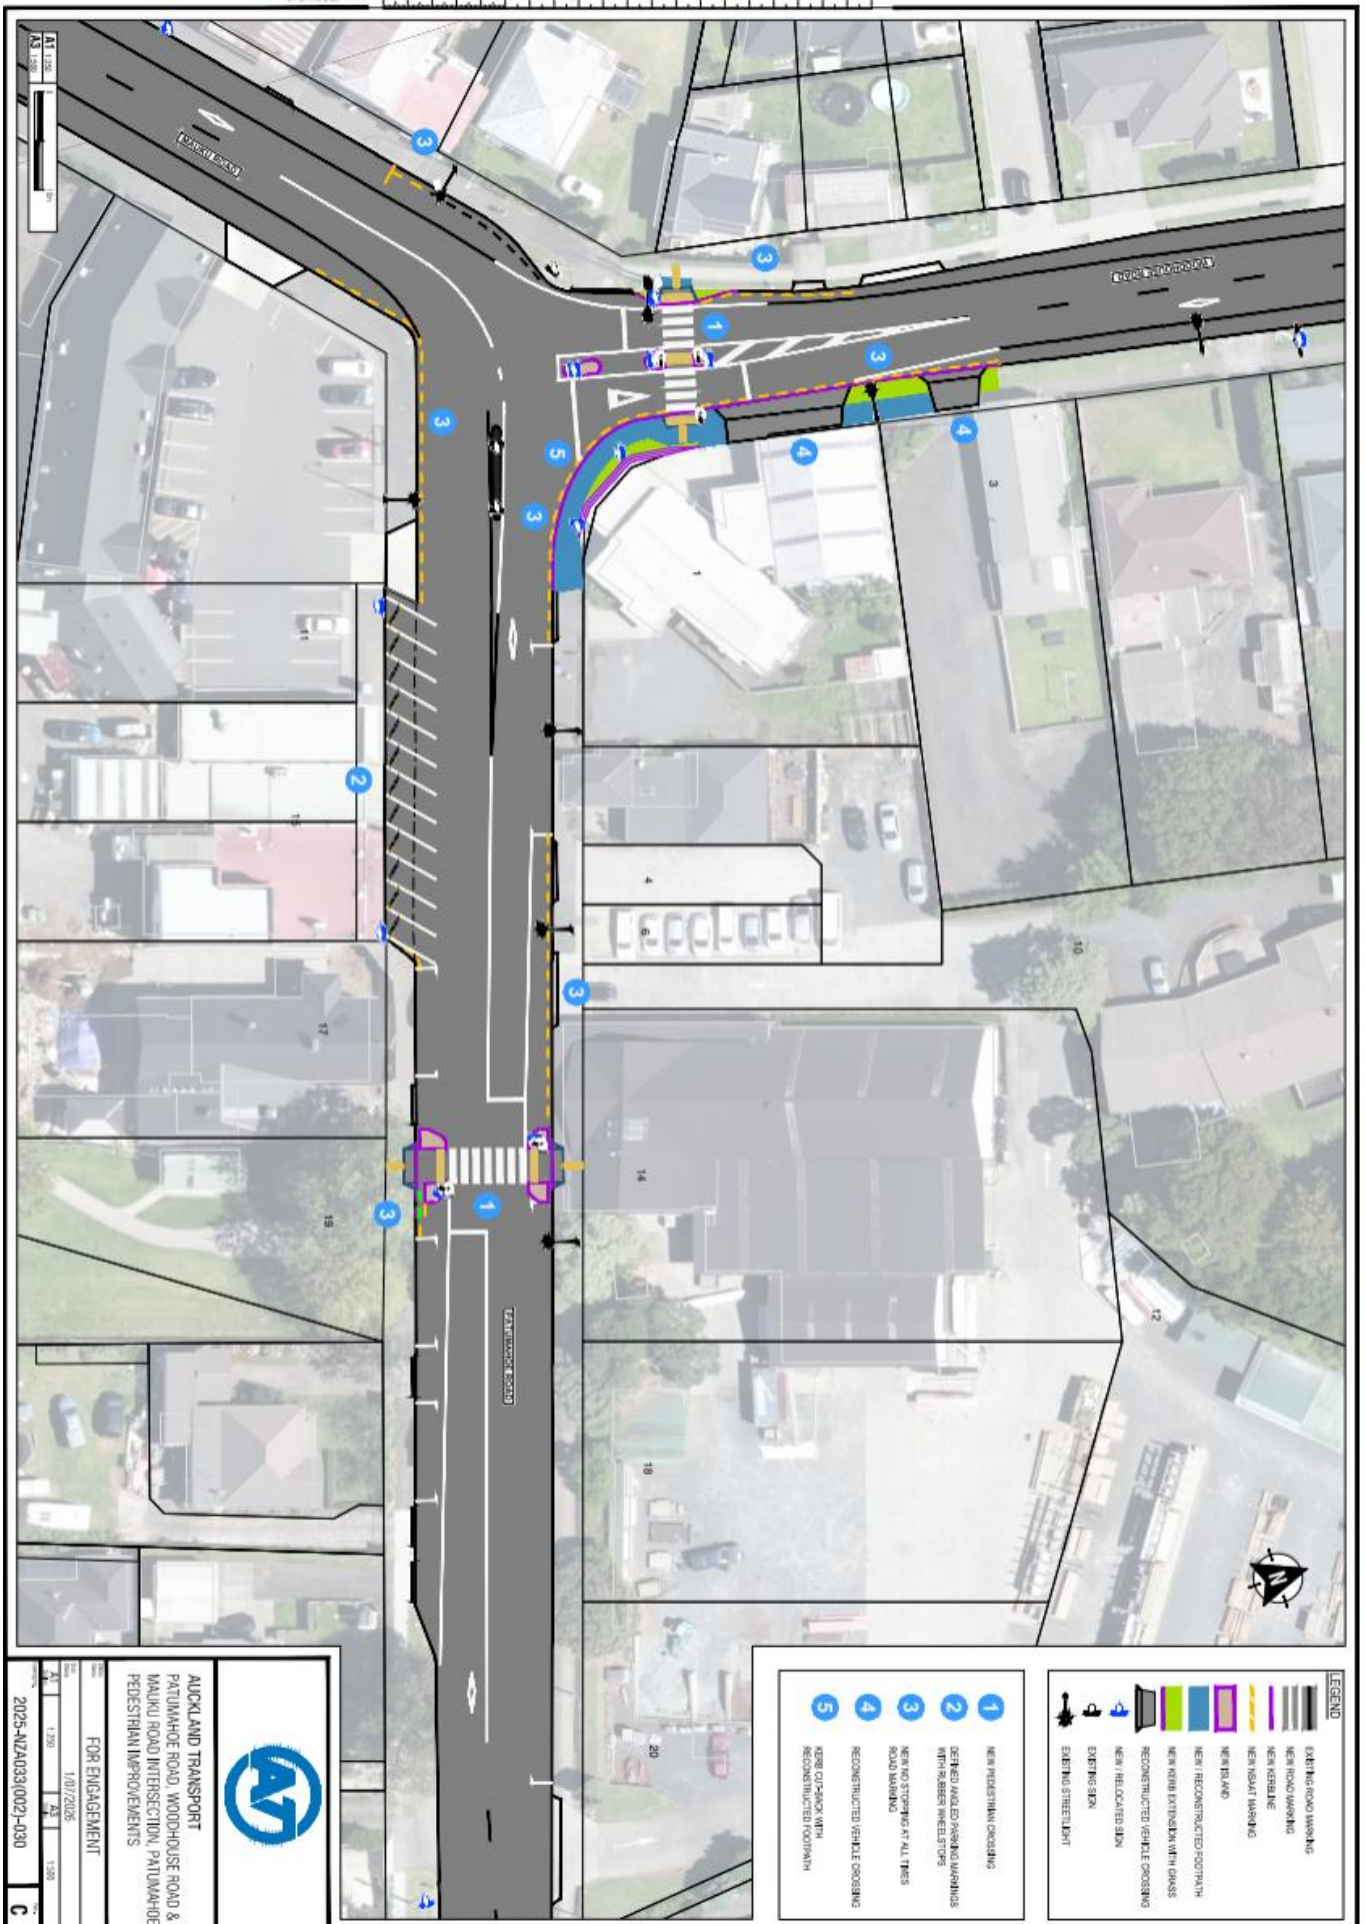

These changes are part of a bigger transport plan

Auckland Transport, the Franklin Local Board and Auckland Council are working together to prioritise and deliver local safety and accessibility improvements across the region as part of the Franklin Targeted Rate Paths Programme.
